V-SKIN EAR CLEANER TRIS-EDTA

Ear cleaner for purulent ear discharge

SIMPLY EFFICIENT

V-SKIN EAR CLEANER **TRIS-EDTA** can be used as a complement to the treatment of ear infections caused by bacteria.

KEY INGREDIENTS

V-SKIN **EAR CLEANER TRIS-EDTA** ingredients help to clean purulent ear discharge and remove bacterial biofilm. At the same time, they work synergistically with the anti-microbials applied in otitis treatment, enhancing their effect.

Increases bacteria sensitivity to antibiotics

Enhances the chelating action of EDTA

IMPORTANT FEATURES

- Non-ototoxic
- Non-irritant
- Alkaline pH
- Potentiates the effect of antibiotics
- Aqueous and non-greasy formula
- Suitable for long-term use and to prevent relapses
- With flexible cannula dispenser for easier application
- 125 ml bottle

HOW TO USE IT

- It is recommended that the product should be applied 20-30 minutes before pharmacological ear treatment.
- Apply a sufficient quantity to entirely fill the ear canal while holding the ear pinna with the other hand.
- Massage the base of the ear canal for at least 1 minute, so that the product mixes with the purulent discharge, facilitating its removal.
- Allow the pet to shake its head in order to expel the mixture of secretion and product from inside the ear canal. Wrap a finger in gauze and clean the opening of the ear canal and the pinna, taking care not to insert it too deeply, in order to avoid causing damage to the animal. Do not use cotton buds. Clean the cannula after each use.
